REASONS FOR ALLOWANCE

1) The following is an examiner's statement of reasons for allowance: None of the references cited either alone or in combination provide the specific teaching of processing a measured wheel angular speed in a sliding mode observer to calculate an estimated differential wheel torque, the differential wheel torque being the difference between the wheel drag torque, generated at the interface of the tire and the ground surface, and the applied brake torque; generating a threshold differential wheel torque from measured wheel angular speed; and generating a braking control signal from comparison of the estimated differential wheel torque and the threshold differential wheel torque.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
